

# Hyperlink Instructions

## Power Point

You already know what Hyperlinks are. When you are on the internet and you click on an underlined word (or a picture) and the webpage goes somewhere else, that's a hyperlink. It links you to another page or file.

1. Create your trivia game (any type) with at least 10 pieces of trivia.
2. Make it look nice. You can adjust any designs, fonts, colours, add shapes, images, etc.
3. **WHEN READY TO HYPERLINK** (you have all your information typed and ready to go)
  - a. Select your word, image, shape, whatever it is you are going to use as your link.
  - b. Right Click→Hyperlink.
4. Click on **Place in this document** and in the center window, select which title slide you want it to link to. Click OK.

5. Remember to include some way to get back to your trivia game board.
6. Have someone in the class check your project. They should hit the F5 key on your keyboard and check all of your hyperlinks.
  - a. Print in **HANDOUTS**
  - b. If everything worked, have whoever checked it sign the bottom of each page, staple and turn in.
7. If certain links did not work, have your partner circle those, then sign their name on the bottom. Staple everything and turn in.
